## The intimate dimension

We all dream of having our erotic fantasies come true. This unique collection of stereograms takes us one heartbeat closer to seeing and feeling them as if we were there.

Ethereally real, shifting and swaying, the bodies of the dream-like lovers in these pictures do what they enjoy most. Full of fun, brimming with passion, teasingly and provocatively, they pursue their sensual delight. We are there with them, our mind's eye conjuring fancied features on their ghostly faces, forming an

intensely private relationship with their pleasure. For these are truly our very own players in the theater of the erotic, to be gazed at with our own individual predilections.

Photographs are a depiction of reality with no room for imagination; our 3D lovers are magically here for us to fashion according to our wishes. While strikingly solid to the eye, they retain the mystery of strangers until our secret longings make them our perfect partners in pleasure.

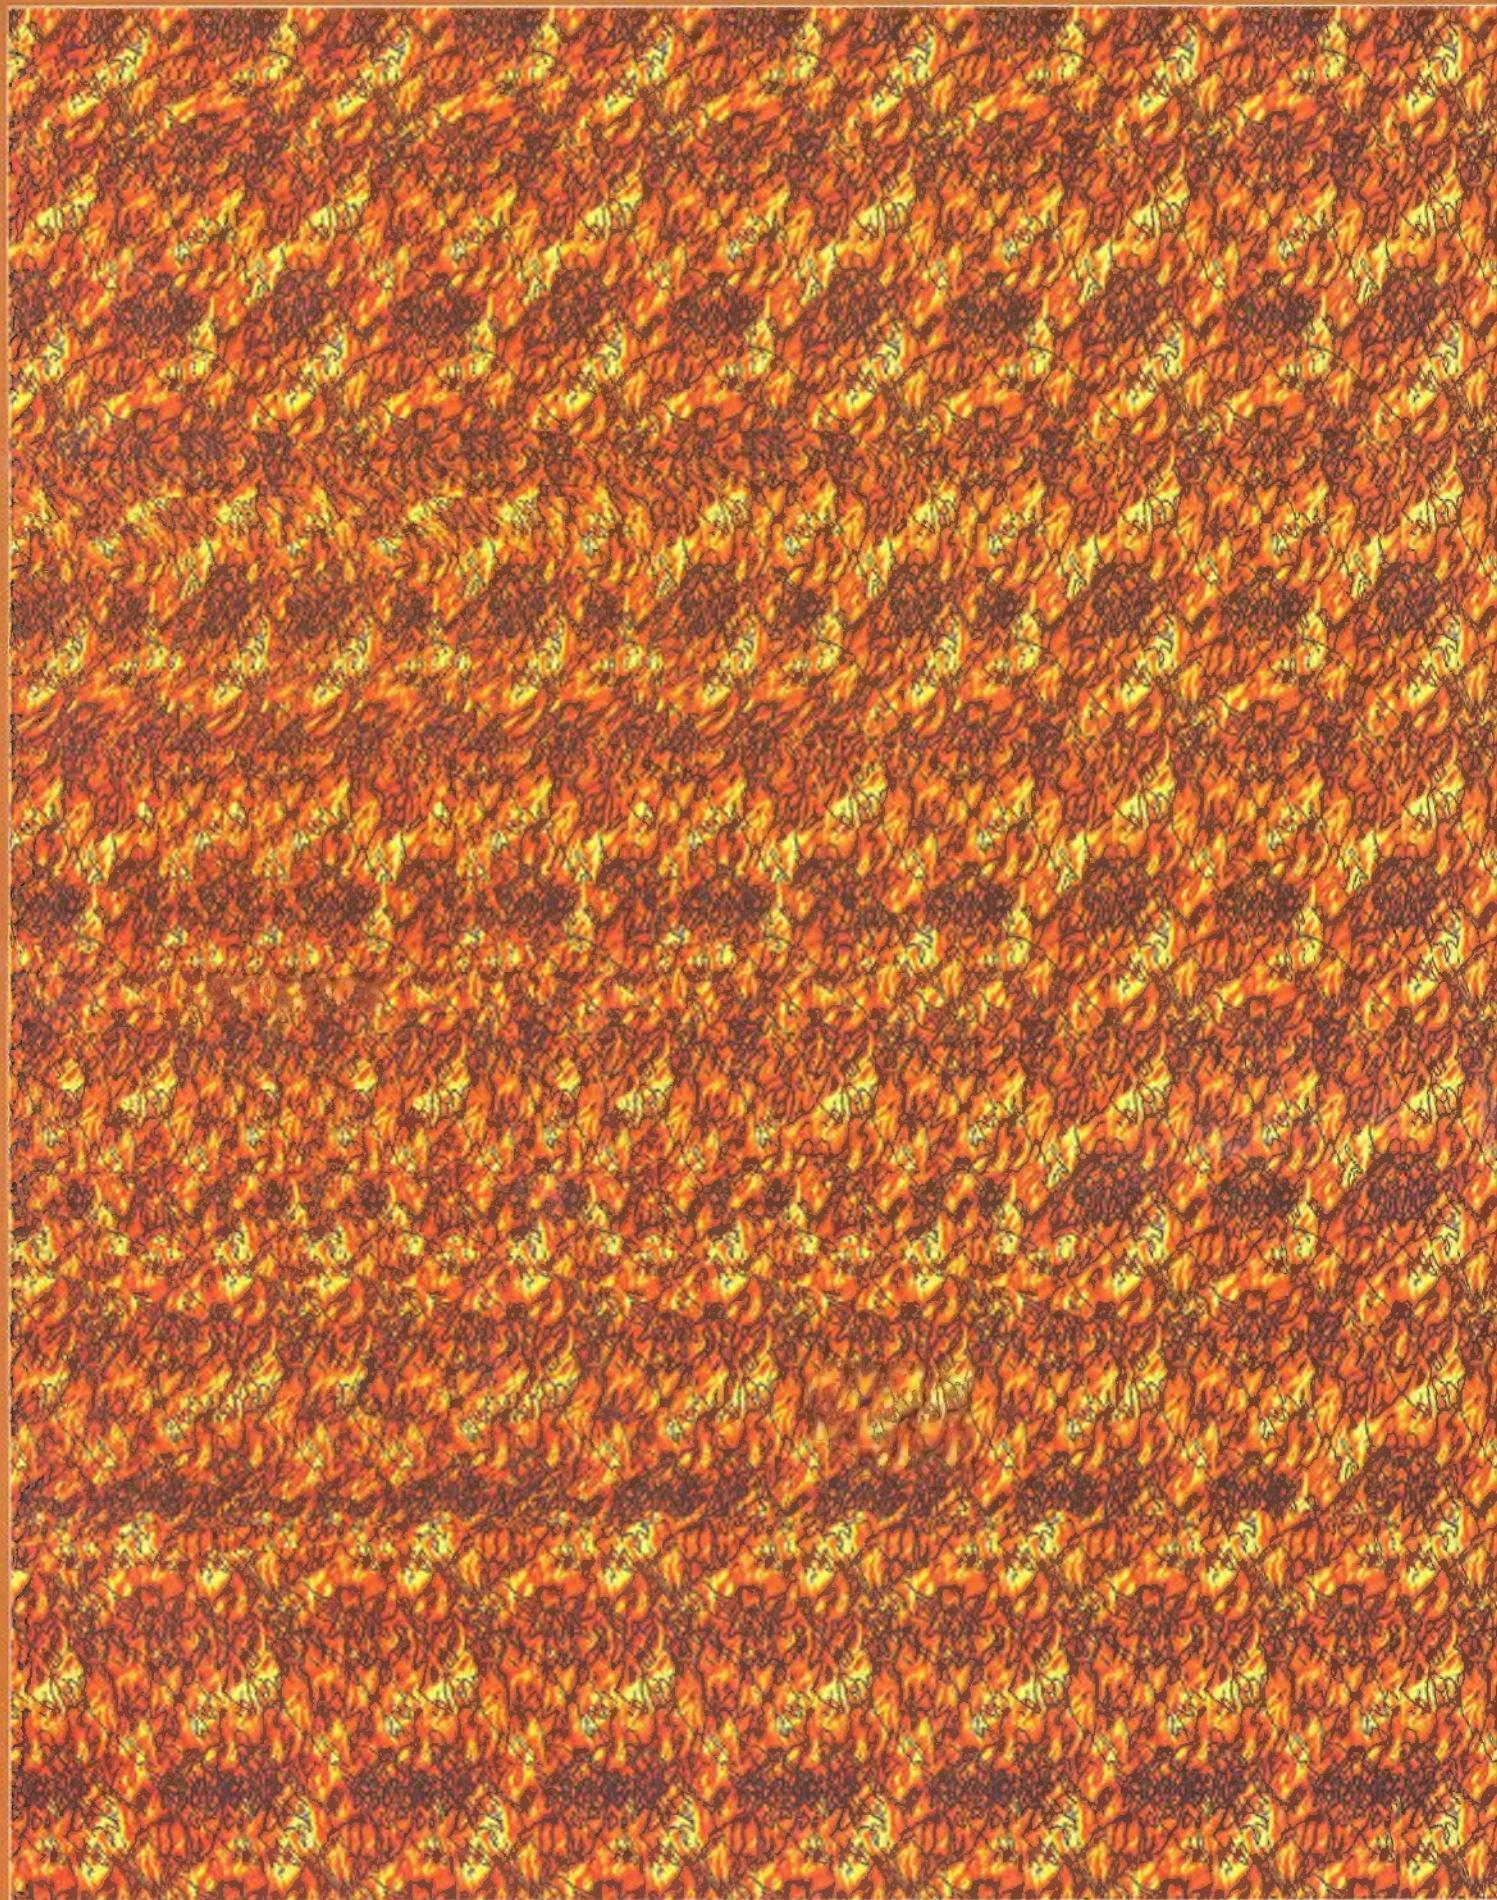

Join with the sensuous alter-reality—and have fun.

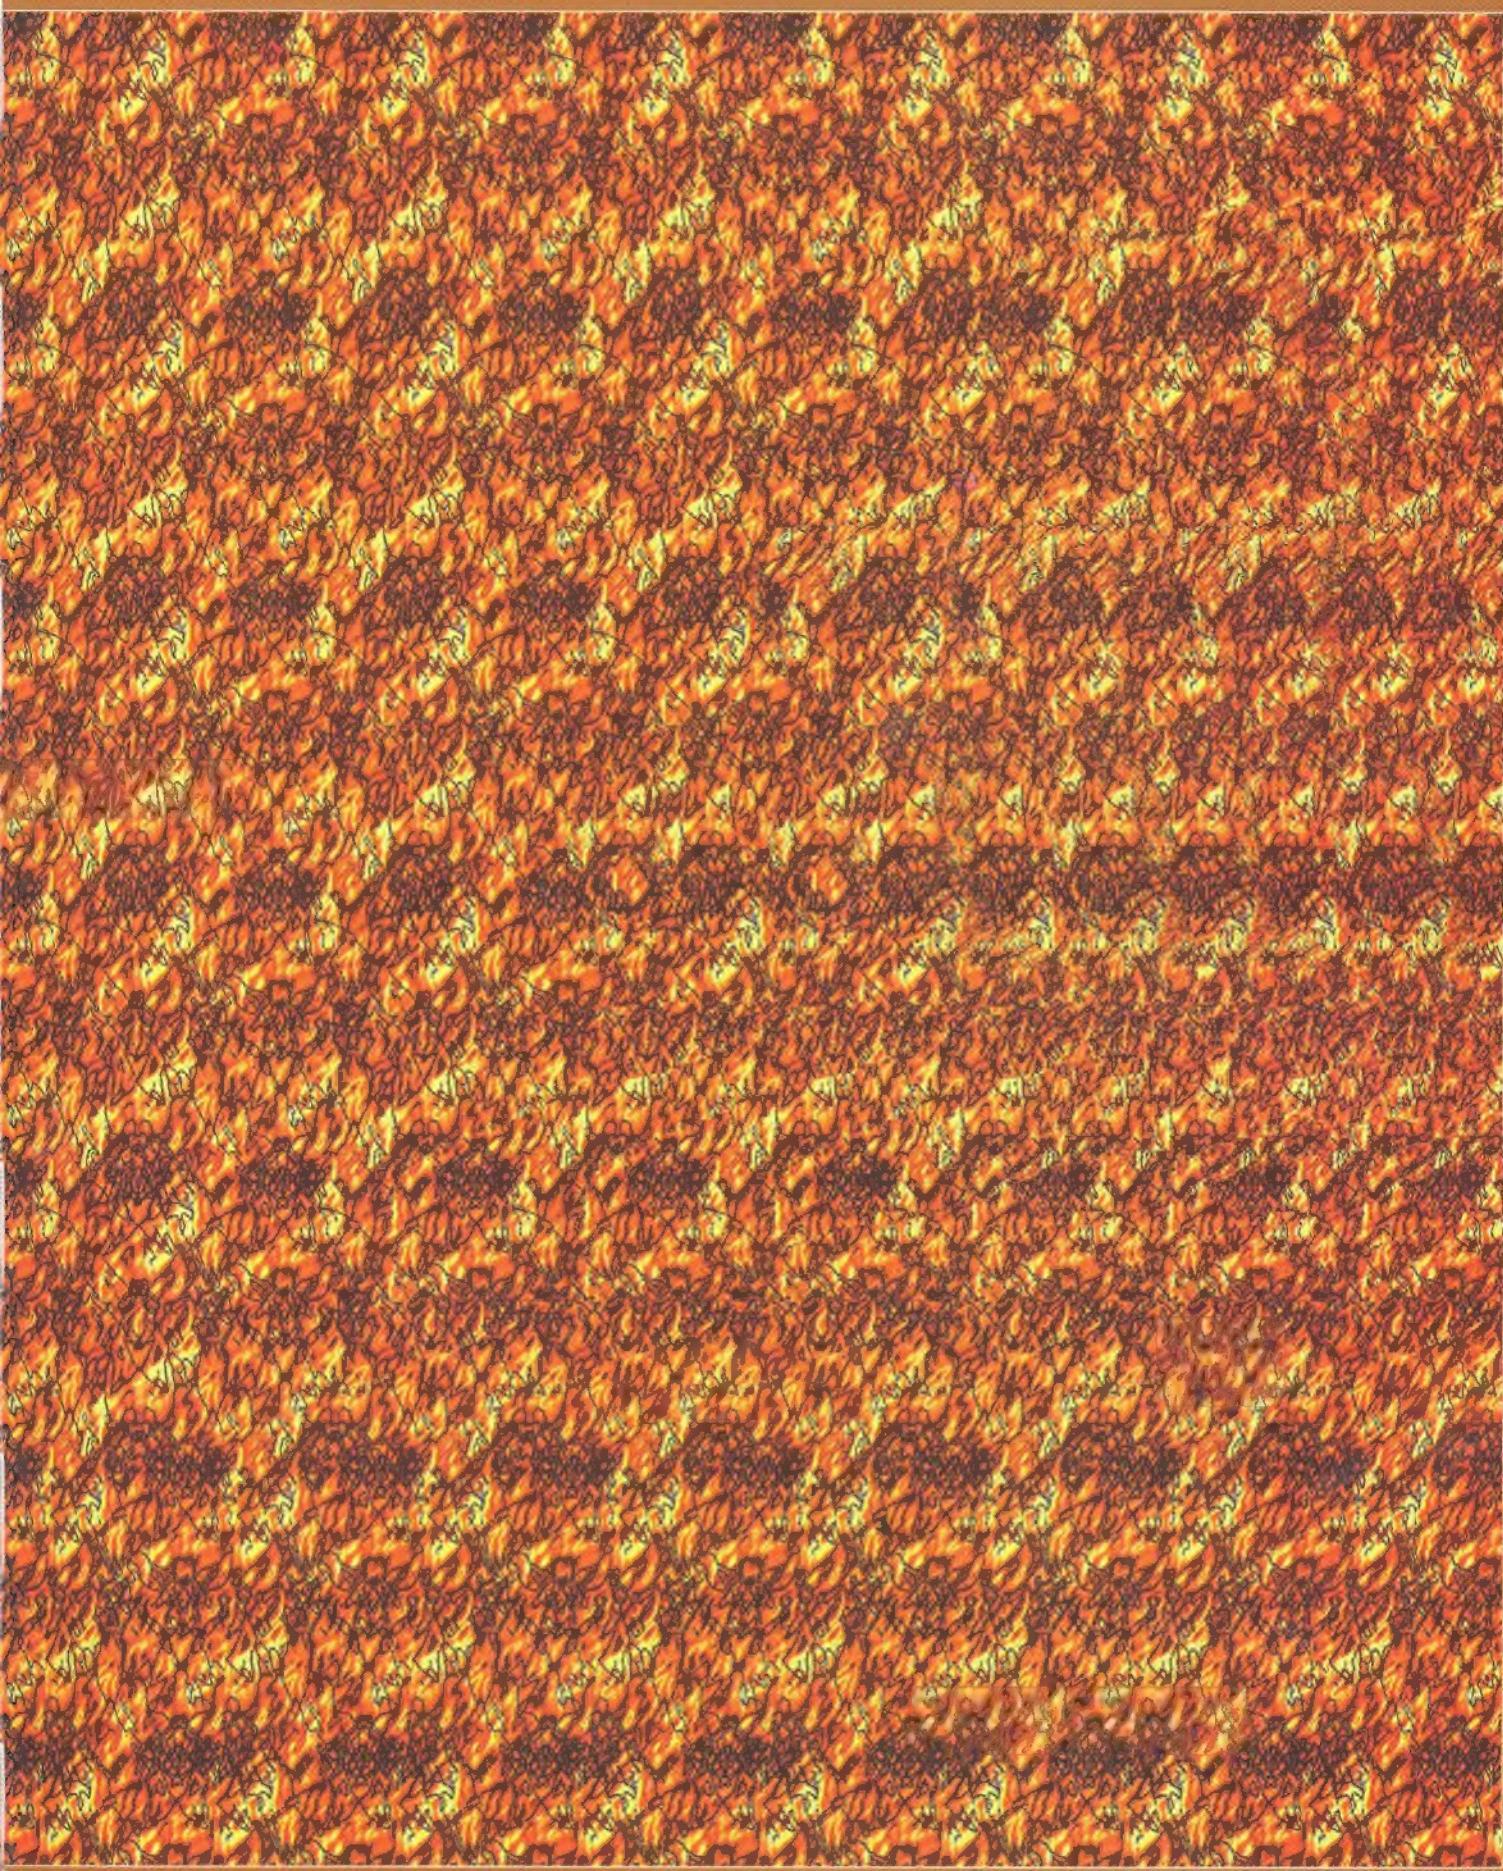

*The solutions to the front cover and page three stereogram images (left) are only a foretaste of what you will experience in the following pages.*

**Most of you will know how to view 3D stereogram images. If not, here are some helpful tips.**

**In a quiet, well-lit place, hold up the page, level with and quite close to your eyes. Focus as if you were looking at something much further away than the book you hold. Relax and take in the out-of-focus pattern. Slowly move the page away from you, and soon the blurred pattern turns into multi-layered shapes which form the hidden image. Let your eyes roam over the whole 3D scene to enjoy all the details. Gently altering the angle of the book this way and that adds to the reality.**

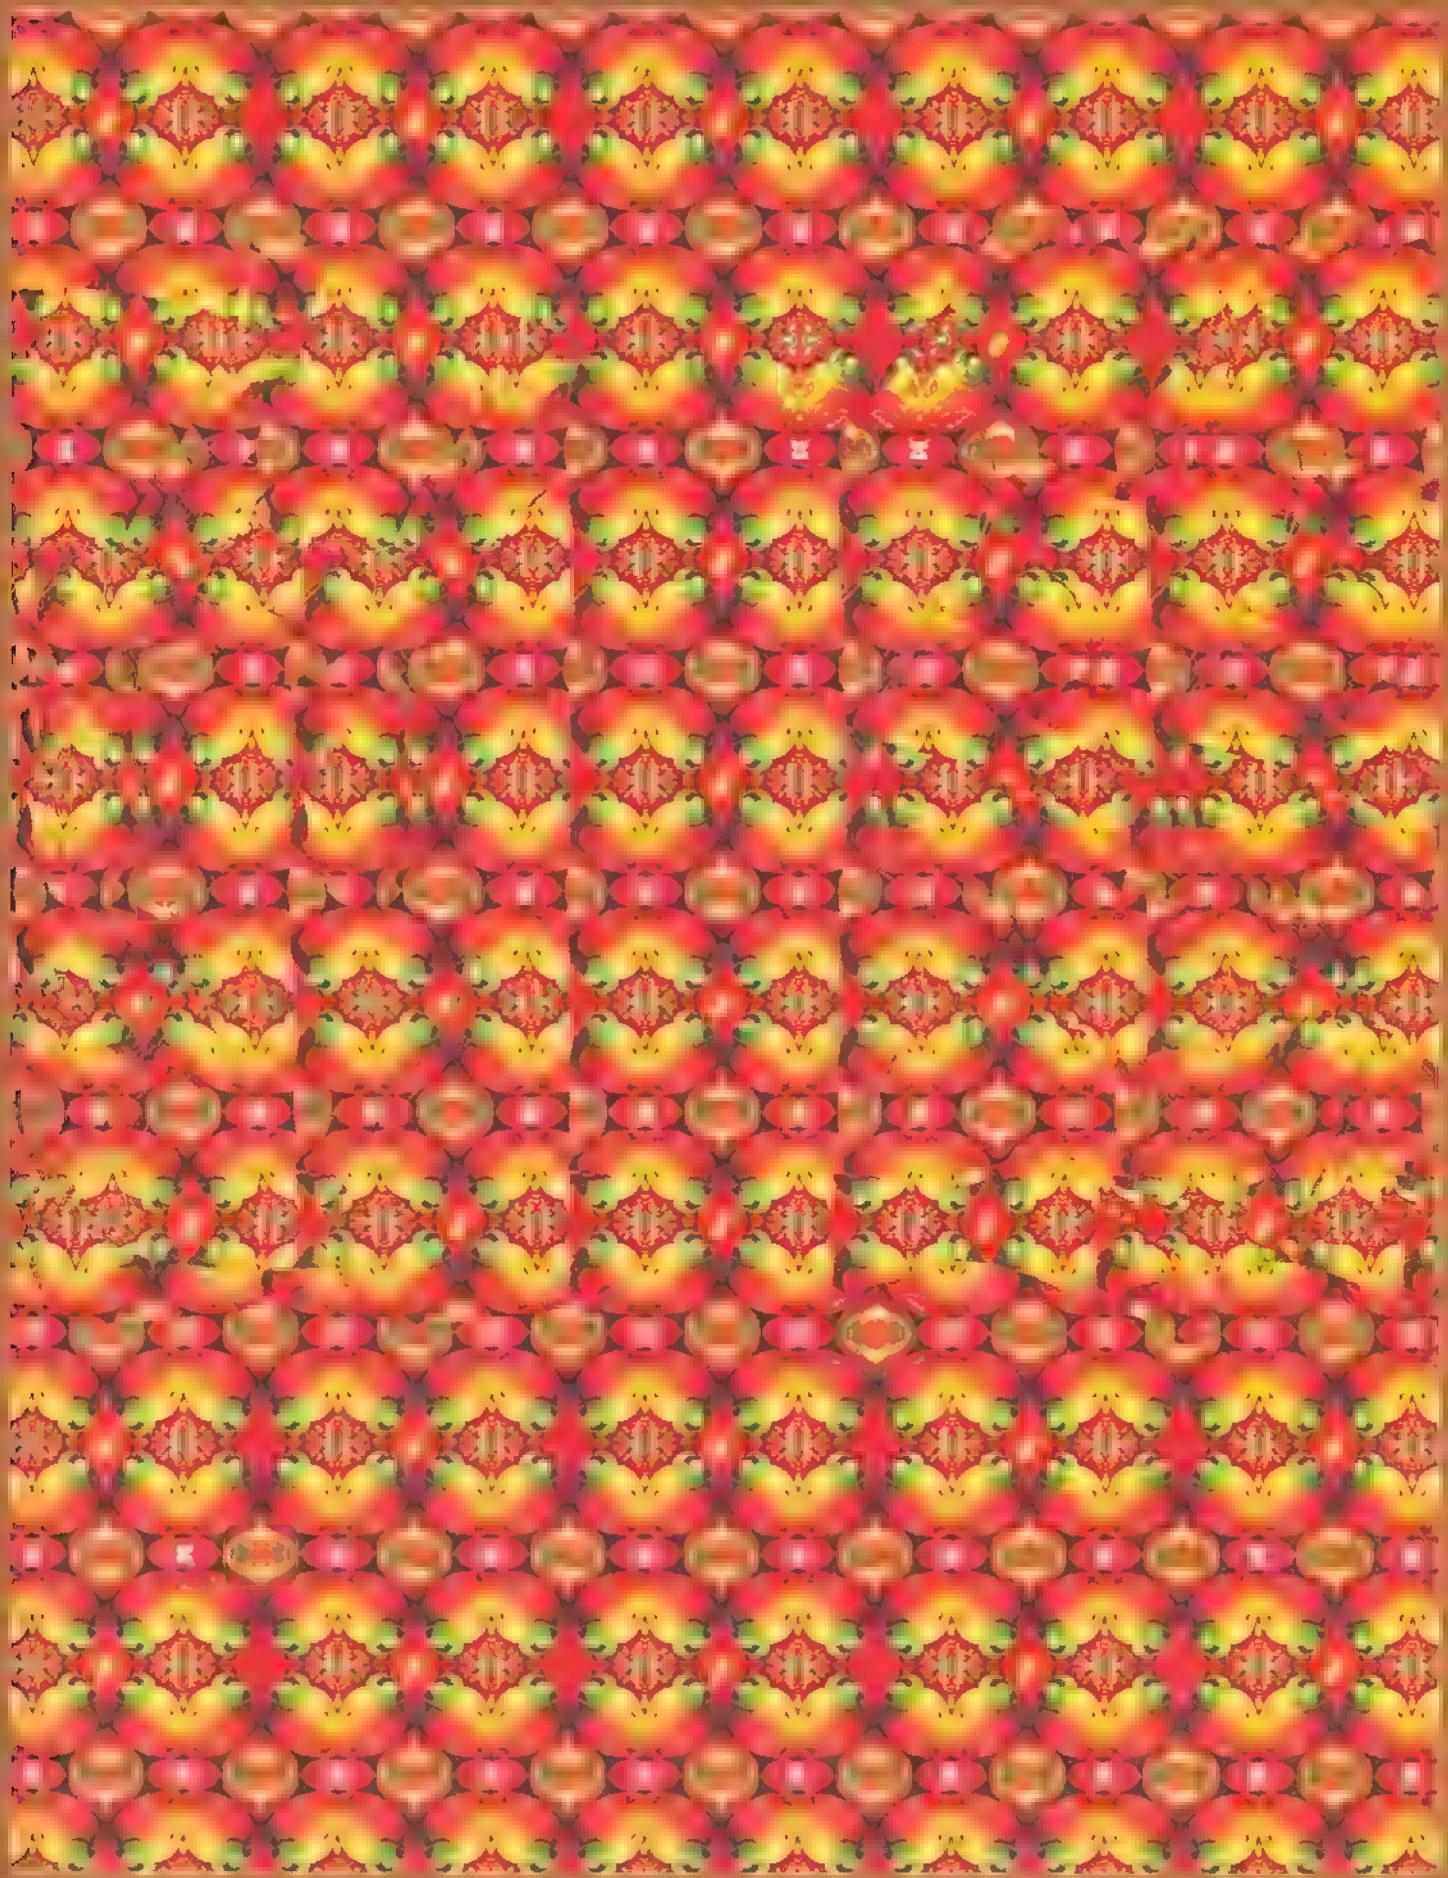

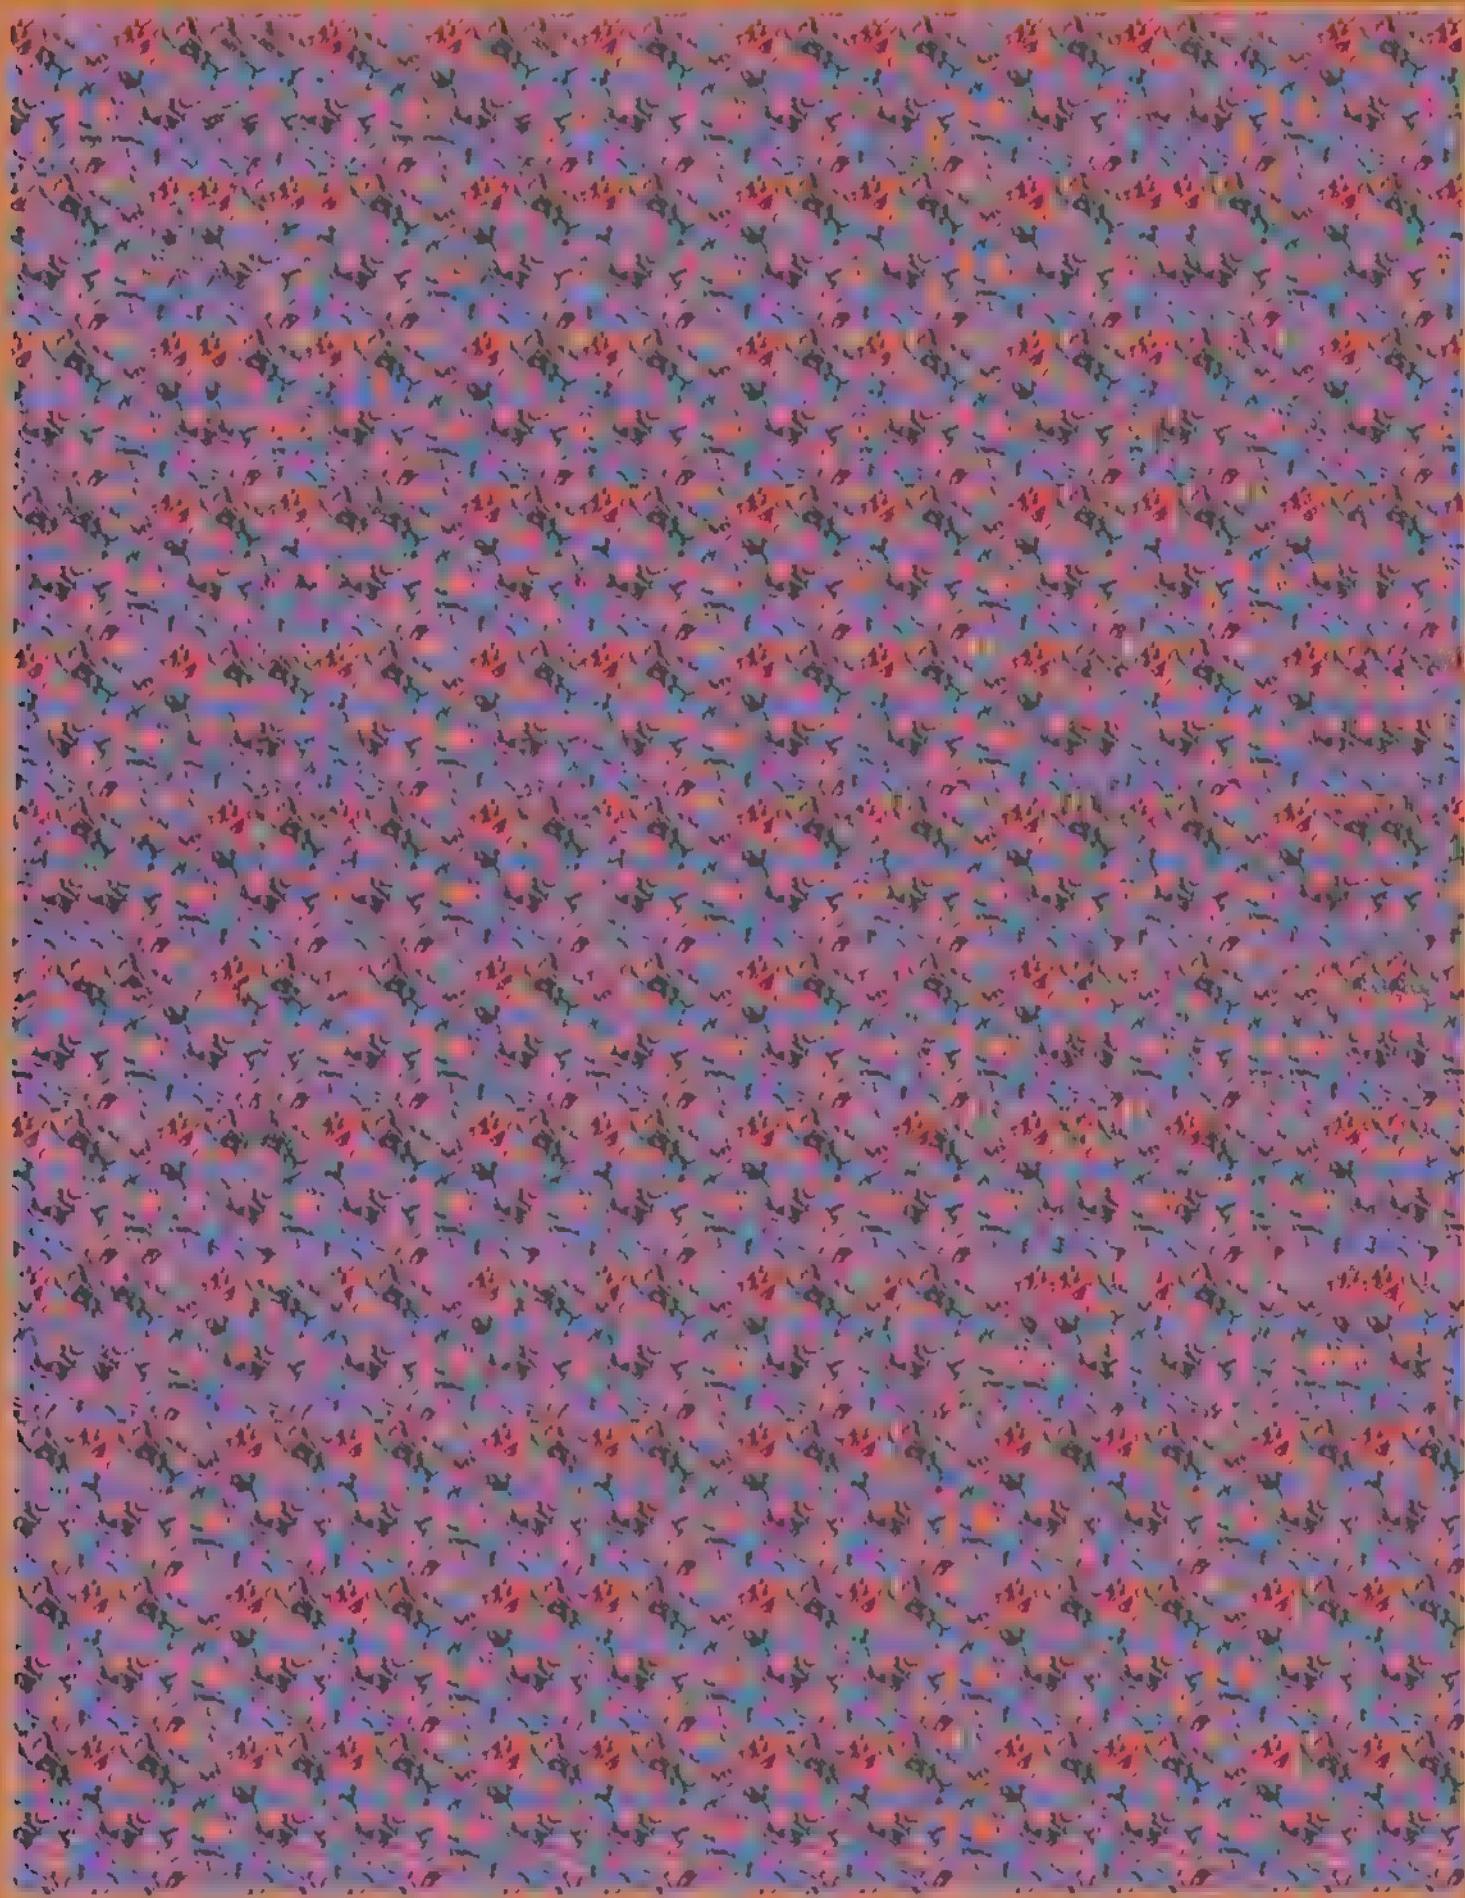

The image features a dense, abstract background composed of numerous overlapping brushstrokes in shades of orange, yellow, and black. The strokes vary in thickness and orientation, creating a textured, organic pattern that suggests a traditional Chinese ink painting or a stylized landscape. The overall effect is one of depth and movement, with the warm colors providing a rich, autumnal feel.

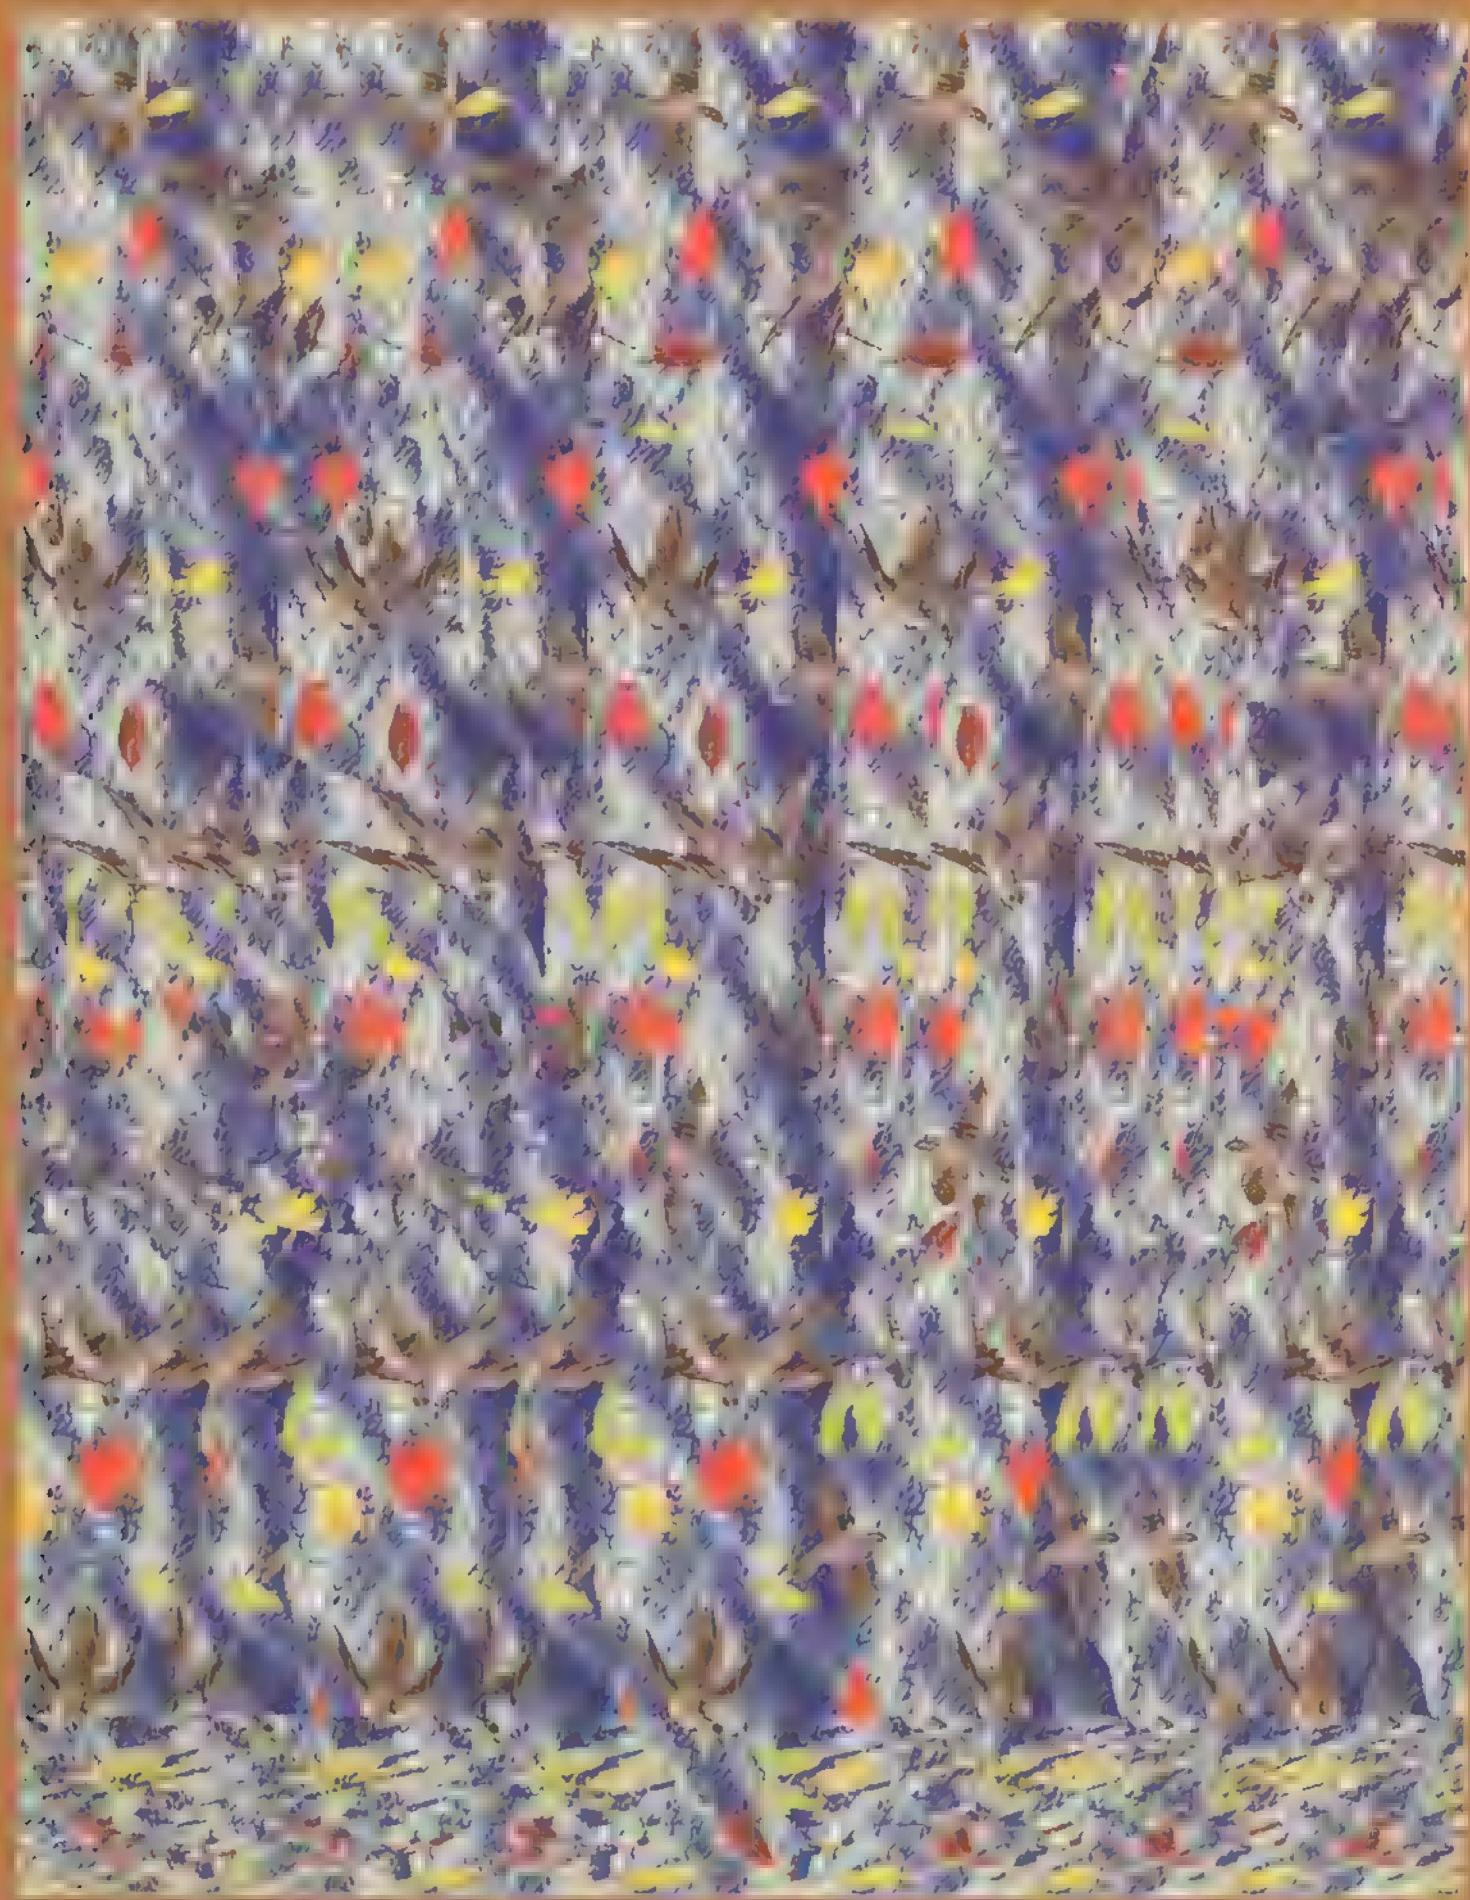

The image shows a dense, abstract pattern of small, dark red and black shapes on a light beige background. The shapes are irregular and vary in size, creating a textured, organic appearance. They are distributed across the entire frame, with no clear organization or meaning. The overall effect is reminiscent of a microscopic view of a biological tissue or a abstract artistic rendering.

Overlaid on this background are numerous small, dark, irregular shapes that resemble stylized leaves or petals. These dark shapes are scattered across the entire area, creating a sense of depth and texture. The overall effect is reminiscent of a close-up photograph of autumn foliage or a microscopic view of organic material.

The pattern is set against a light, textured background that suggests a woven fabric or a microscopic view of a material. The overall effect is one of depth and complexity, with the dark shapes appearing to recede into the distance. The image has a warm, reddish-brown hue, which adds to its organic feel.
